UX Designer & Design Technologist — Interaction Design & Information Architecture

CS-trained UX/Product Designer focusing on information architecture, component-driven design systems, and human-centered interaction models to simplify complex product user experiences.

TECHNICAL SKILLS

- **Design Fundamentals:** Information Architecture, Interaction Design, Human-Centered Design, Progressive Disclosure, Component-Driven Design Systems
- **Prototyping & Frameworks:** Figma, React, Svelte, Tailwind CSS, shadcn/ui, TypeScript, AI-Assisted Prototyping (Gemini, Copilot)

PROFESSIONAL EXPERIENCE

AI Agent Engineer Intern | BCAMP | Remote | Apr 2025 – May 2025

- Engineered Python-based AI agents with empathy-driven iteration on Sophon Chain + Cod3x.
- Developed agent handoff + error-recovery patterns and built lightweight async debugging flows.

Founder, Startery — SkillsHub Platform | React, TypeScript, Supabase | May 2025 – Jun 2025

- Led 3 rapid design-validation cycles (<2 weeks each) and architected interactive high-fidelity prototypes using React.
- Designed progressive-disclosure user flows for complex skill discovery matrices to maximize clarity and minimize user cognitive friction.

Retail + Service Roles | Jewel-Osco, Bengtstens, Homer 33C | 2019–Present

Meat & Seafood Wrapper | Jewel-Osco | Nov 2025 – Present

- Navigated high-volume customer interactions to extract real-world product discovery UX insights and fast situational tracking.

Facilities Custodian | Homer 33C School District | Jun 2021 – Aug 2024

- Optimized environmental reset flows to gain process clarity and map classroom spatial decision cues.

Amusement Ride Assistant | Bengtstens | Oct 2019 – Oct 2022

- Applied safety protocols to real-time service design, fast emotional clarity, and rule-based UX execution.

EDUCATION

Bachelor of Arts in Computer Science | North Central College | Aug 2023 – May 2025

Coursework in Computer Science | Joliet Junior College | Aug 2021 – Jun 2023

Academic Projects

- Blackjack Suite — Multiplayer WebSocket rebuild with Flow Theory difficulty patterns
- Senior Capstone — Real-time social discovery prototype (precursor to MingleMap)

Campus Involvement

- Computer Science Club — ML optimization, microservices, peer-led technical discussions
- Design for America — collaborative design, user research, group decision-making
- Psychology Club — user behavior research + human factors
- NSLS — conflict resolution, adaptive leadership, communication under pressure

SELECTED PROJECTS

Echotrip — Work-Abroad Planner (v1 → v2 EchoGlaze) | SvelteKit, Tailwind, TypeScript

- “Less is more” UX that reduced planning overwhelm by ~70% via curated visa flows and workspace discovery.
- Refined into EchoGlaze (v2): Designed a modular UX decision engine prioritizing structured information architecture.

Retail-Related-Project: Vespera — Cultural Etiquette Explorer | React, TypeScript, Tailwind

- Designed a principle-driven UX system informed by retail-derived emotional pacing and safety cues.
- Built progressive-disclosure flows for cultural etiquette, risk communication, and situational awareness.
