UX Designer & Design Technologist — Interaction Design, IA, Prototyping

UX Engineer specializing in scalable design systems, progressive disclosure, and component-driven architecture for complex, data-heavy workflows.

TECHNICAL SKILLS

- **Information Architecture** — taxonomy design, structural mapping, navigation systems
- **Interaction Design** — flow modeling, micro-interactions, progressive disclosure
- **Design Systems & Prototyping** — component-driven architecture, Figma, React, Svelte, TypeScript
- **AI-Assisted Prototyping** — Gemini, Copilot

PROFESSIONAL EXPERIENCE

Freelance UX/UI & Information Architecture Consultant | Remote | Jun 2025 – Present

- Redesigned Echotrip → EchoGlaze (v2) by building a modular IA structure and decision engine, reducing user planning overwhelm by 70% through clearer pacing and progressive disclosure.
- Created Vespera, an interaction system translating real-world retail safety cues into cultural etiquette flows, improving user comprehension and reducing decision friction.
- Audited multi-page navigation systems and frontend architecture for small teams, improving path clarity and reducing redundant user actions across key flows.

AI Agent Engineer Intern | BCAMP | Remote | Apr 2025 – May 2025

- Designed agent handoff flows and simplified debugging interactions to reduce cognitive load for internal testers on Sophon Chain + Cod3x.

Founder, Startery — SkillsHub Platform | React, TypeScript, Supabase | May 2025 – Jun 2025

- Led 3 rapid design-validation cycles and engineered progressive-disclosure flows for complex skill discovery matrices, improving onboarding clarity for early testers.

Retail + Service Roles | Jewel-Osco, Bengtstens, Homer 33C | 2019–Present

Meat & Seafood Wrapper | Jewel-Osco | Nov 2025 – Present

- Extract real-world product discovery UX insights from high-volume customer service interactions.

Facilities Custodian / Ride Assistant | Homer 33C School District & Bengtstens | Oct 2019 – Aug 2024

- Applied environmental reset flows, safety protocols, and situational tracking to physical service design models.

EDUCATION

Bachelor of Arts in Computer Science | North Central College | Aug 2023 – May 2025

Coursework in Computer Science | Joliet Junior College | Aug 2021 – Jun 2023

ACADEMIC PROJECTS & INVOLVEMENT

- **Blackjack Suite & Senior Capstone:** Built WebSocket multiplayer code and real-time social discovery prototypes.
- **CS Club & Design for America:** Focused on ML optimization, collaborative user research, and group decision-making.
- **Psychology Club & NSLS:** Researched human factors behavior and trained in conflict resolution and adaptive leadership.
