UX Engineer & Design Technologist

CS-trained UX Engineer & Design Technologist crafting emotionally readable, low-noise tools for remote and async-first teams through rapid prototyping and principled interaction design.

TECHNICAL SKILLS

- UX: principle-driven prototyping, emotionally attuned flows, problem framing, progressive disclosure
- **Frontend:** React, SvelteKit, Next.js 14, TypeScript, Tailwind, shadcn/ui
- **Backend:** Node.js, Supabase, Django, REST APIs, WebSockets
- **Tools:** Vite, GitHub, Figma, AI-assisted development tools (Copilot, Gemini, Google AI)

PROFESSIONAL EXPERIENCE

AI Agent Engineer Intern | BCAMP | Remote | Apr 2025

- Prototyped Python-based AI agents with empathy-driven iteration on Sophon Chain + Cod3x.
- Designed agent handoff + error-recovery patterns and built lightweight async debugging flows.

Founder, Startery — SkillsHub Platform | React, TypeScript, Supabase | May 2025 – Jun 2025

- Led 3 rapid market-validation cycles (<2 weeks each) and solo-built MVP with React + Supabase.
- Designed progressive-disclosure UX for skill discovery + pricing clarity; sunset after UX/DX convergence.

Retail + Service Roles | Jewel-Osco, Bengtstons, Homer 33C | 2019–Present

Meat & Seafood Wrapper | Jewel-Osco | 2025–Present

- High-volume customer navigation → real-world product discovery UX insights.
- Developed emotional pacing, signal-reading, and risk-communication skills.

Facilities Custodian | Homer 33C School District | 2021–2024

- Systems maintenance → process optimization and classroom reset flows.
- Observed teacher workflow patterns → early environment-driven UX insights.

Amusement Ride Assistant | Bengtstons | 2019–2022

- Safety protocols → rule-enforcement UX and real-time service design.
- Rider communication under pressure → rapid decision-making and emotional clarity.

EDUCATION

Bachelor of Arts in Computer Science | North Central College

Coursework in CS | Joliet Junior College

Academic Projects

- Blackjack Suite — Multiplayer WebSocket rebuild with Flow Theory difficulty patterns
- Senior Capstone — Real-time social discovery prototype (precursor to MingleMap)

Campus Involvement

- Computer Science Club — ML optimization, microservices, peer-led technical discussions
- Design for America — collaborative design, user research, group decision-making
- Psychology Club — user behavior research + human factors
- NSLS — conflict resolution, adaptive leadership, communication under pressure

SELECTED PROJECTS

Echotrip — Work-Abroad Planner (v1 → v2 EchoGlaze) | SvelteKit, Tailwind, TypeScript

- “Less is more” UX that reduced planning overwhelm by ~70% via curated visa flows, cost calculators, and workspace discovery.
- Refined into EchoGlaze (v2): emotionally readable, principle-driven UX system with clearer pacing, reduced decision noise, and modular planning components.

Retail-Related-Project: Vespera — Cultural Etiquette Explorer | React, TypeScript, Tailwind

- Designed a principle-driven UX system informed by retail-derived emotional pacing and safety cues.
- Built progressive-disclosure flows for cultural etiquette, risk communication, and situational awareness.
